Grading of MS Statistics Practicums

Fail	Pass	High Pass
Student is unable to formulate problem or, if able to formulate problem, implementation of statistical tools to analyze problem is lacking or inappropriate.	Student is able to formulate problem and implement statistical analysis but with a few errors. Analysis may be appropriate but lack full development. Some evidence of methods/procedures discussed in program of work.	Student formulates problem correctly with minimal errors, if any at all. Statistical analysis of problem is correct and shows evidence of methods/procedures discussed in program of work.
