Course Description

This studio course will focus on developing both creative and technical printmaking skills. Each student will choose a thematic direction for the semester and write a proposal/contract for their semester research and work. Library research will be required during the semester. One short paper will be required during the semester. Critiques will be held at regular intervals during the semester (failure to attend a critique will result in a F for that project grade). This is a lab course and most of the work cannot be done at home so expect to spend out of class time working in the studio on your projects.

Course Objectives

- Understand and master demonstrated advanced technical printmaking techniques
- Develop advanced conceptual, analytical, and creative thinking skills
- Develop sound and exhaustive methods in visual problem solving
- Develop verbal skills in expressing clear, aesthetic criticism during class critiques

Policies

1. Bring a sketchbook to all class sessions for notes and preparatory sketches. Notebooks may be graded at the mid-term and at the end of the semester.
2. Follow shop safety rules and clean up procedures or lose your privilege to work in the shop independently.
3. Technical demonstrations are a very important part of this class. Take notes and ask lots of questions!
4. Class related questions???, as long as you have already read the handouts, assignments and calendar I am happy to answer repeatedly until you understand!
5. Participate fully in every class because discussion about and viewing other student's prints are very important learning tools.
6. Semester end shop clean up is mandatory. If you do not participate your grade will suffer.
