TEXAS COMMON COURSE NUMBERS

Common Course Numbers

The Texas Common Course Numbering System was developed in part to assist students in identifying which courses at one college will meet specific course requirements at another college. In other words, the common course numbering system promotes the successful transfer of course work among colleges and universities in Texas, making the transfer process easy for students.

The common course number has a standardized four-letter prefix followed by a four-digit number — example, ENGL 1301. The four-letter prefix identifies the subject area. Each digit in the four-digit sequence gives additional information about the course. The first digit identifies the course as either freshman level (1) or sophomore level (2). The second digit identifies the number of credit hours a student will earn upon completion of the course. Most often this digit will be a 1, 2, 3, or 4. The final two digits serve to establish the sequence in which courses are generally taken.

In the course description sections of the catalog, the common course number is shown in brackets — example, [ENGL 1301]. The following is a list of the common course numbers currently adopted by Sam Houston State University. Courses which fulfill one of the General Education Requirements for the Core Curriculum are identified with the letters GE to the right of the Sam Houston State University course number.
