

Technical Support

## Welcome

Welcome to the **Getting Started with Blackboard** Online students. Part of having a successful online course is learning how to operate and interact in the Blackboard environment. This resource will equip you with the skills you need to succeed in your online course. It will cover how you access your online course, how to communicate with classmates and your professor, how to take tests and check your grades.

Below are the learning objectives for this resource as well as where you will go and what you will do on your learning journey, we are excited to be on it with you.

### Learning Objectives

After reviewing the materials of this resource, you will be able to:

- Successfully navigate the Blackboard environment
- Setup and Access your Bb Home
- Understand the basics skills to be a successful online student
- Communicate with classmates and professors online
- Collaborate with classmates using social learning tools
