

Grading of M.S. Statistics Oral Exams

Fail	Pass	High Pass
Student is unfamiliar with the development and/or use of several of the key theorems, procedures, or methods in the core coursework.	Student is able to name and describe each of the major theorems, methods, and procedures in core coursework with a few errors. The student is also able to derive key estimators and prove important theorems with a few flaws.	When asked, student is able to name and describe any theorem, method, or procedure in core coursework with minimal errors. In addition to deriving and proving key estimators and theorems, student draws connections and relates methods across core courses.
