

Faculty Senate Survey Results

The response to the Faculty Senate Survey shows that the faculty is more than satisfied with Library Services. Since 2001 the satisfaction score has increased with a slight dip in 2007. A review of each college's response shows a mean for Library Service of over 4.0 for all but Criminal Justice. While the Faculty's view of Library Services supporting the curriculum is not significantly lower than the support for research, the results are lower, in 2007 the mean was 3.90. The Library continues to talk with Departments and individual faculty members about these results.
