CONSTRUCTION NOTES:

- All work and materials shall be inspected by SHSU personnel. Call 936/294-1191 to arrange inspections of various phases of work.
- TECHNICAL REQUIREMENTS:
 - Paved Areas and E-Francis - Use 2" back cement stabilizer sand. Place in lifts not to exceed 6" and tamp well compacted.
 - Unpaved Areas - Use fine material and compact to 90% of ASTM D-1557 (Standard Proctor).
- Contractor shall locate all existing underground utilities before construction. Contractor shall protect all existing utilities, streets, and adjacent improvements and be responsible for any damage that may occur during construction.
- Adequate means of erosion control shall be utilized during construction to offset the impact on streets and adjacent property. It shall be the responsibility of the contractor to erosion control.
- All trenches cut comply with the requirements of DSHA Standard No. 2226 for excavation and shoring operations.
- All assessments and S&W's shall be restored to original condition or better at the completion of work. Daily cleanup of work to road-way to offset impact on streets and adjacent property.
- Electrical Service Connection - See Houston State University to further electrical service at the East Plant. Coordinate routing and connection details with SHSU personnel.
