Students will also explore the lifelong interaction between nature and nurture. Students will also learn the specific issues we face as we progress through life, such as acquisition of emotional, physical, cognitive, and moral skills and the changing balance between dependence and interdependence as we move from infancy to adolescence, adulthood, and later life.

TEXTBOOK: (Required)

Santrock, J. W. (2008). *Life-Span Development* (11th ed.). Boston: McGraw-Hill.

COURSE FORMAT:

Class will consist of lecture and discussion. Students are strongly encouraged to actively participate in class through discussion and to keep up with their textbook readings (please refer to tentative course outline for reading assignments). Students will be assigned a project that will be presented to the class during scheduled presentation times.

EXAMS:

There will be four in-class exams, three exams and a final exam. The exams will consist of fifty multiple-choice questions. Exam questions will come from lecture material and textbook material, which may or may not have been covered in class. Therefore, it is very important that you read the assigned readings for each exam. The tentative outline indicates which chapters will comprise each exam, tentative exam dates, and other important dates. The final exam will consist of fifty multiple-choice questions, and it will not be comprehensive; it will only cover the material presented after the third exam. Course grades will be determined as a percentage of the total points available.
YOU WILL NEED SCANTRONS (GREEN) AND No. 2 PENCILS FOR EACH EXAM

EXAM POLICY: *If you show up to take a scheduled class exam more than ten (10) minutes after the beginning of the exam, you will not be allowed to take the exam and will have to take a make-up exam.*
